Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C.

121:

- I. Claims 1-17, 60-63, drawn to method of determining the location of a mobile station, classified in class 455, subclass 456.1.
- II. Claims 18-34, 64-65, drawn to detail of a mobile station, classified in class 455, subclass 550.1.
- III. Claims 35-46, drawn to detail of a base station, classified in class 455, subclass 561.
- IV. Claims 47-59, drawn to integrated circuit, classified in class 455, subclass 333.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as detail of a mobile station. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as detail of a base station. See MPEP § 806.05(d).

Art Unit: 2685

Inventions I and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention IV has separate utility such as detail of an integrated circuit. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for any other Groups (II-IV), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
